

Eleganza **Mano**

Patient bedside cabinet

Eleganza Mano – easy manipulation and operation

The unique construction of the Eleganza Mano patient bedside cabinet has been designed with patient independence, infection control and ease of handling in mind.

- PATIENT INDEPENDENCE
- SAFE ROUNDED EDGES
- EASY MANIPULATION
- EASY CLEANING

■ The height and tilt angle of the eating board can be easily adjusted using just one hand.

■ A lockable drawer provides the patient with a secure and safe place to store important items.

■ The location of the castors significantly increases the stability of the bedside cabinet, especially when the eating board is extended and loaded.

■ Easily accessible shelf which can be used to store a bedpan.

EASE OF HANDLING

- Combination of central braking system, handrails and position of castors ensure that the patient can easily manipulate the bedside cabinet.
- Ergonomically designed top and bottom drawers can be accessed from both sides allowing ease of manipulation and patient access.
- Patient can independently access eating board, towel holder, shelf for bedpan and other storage spaces.

INFECTION CONTROL

- Easily accessible central braking mechanism can be activated by the patient using just one hand, allowing the bedside cabinet to be moved to a convenient position.
- Smooth and non-absorbent surfaces ensure that the bedside cabinet is easy to clean and decontaminate.
- All drawers and internal trays can be removed to enable thorough cleaning of the cabinet.

The patient can adjust the height of the eating board using just one hand.

Easily accessible central braking control

Drawers can be accessed from both sides allowing easy patient access.
